

# Agrocel's Maha Kite

Water Soluble Chitosan

AVAILABLE IN 5 GM & 70 GM PACK

## Agrocel's Maha Kite

**Agrocel's Maha Kite** is a high efficiency Chitosan. Chitosan is an amino polysaccharide derived by deacetylation of the naturally occurring biopolymer chitin. Chitosan can be marked as a green product. Chitosan application results in stimulation of plant growth and increase of crop yields. Chitosan products are used against plant pathogenic bacteria that induce decay and harmful effects on agricultural crops during the growing season and postharvest phase. Chitosan act as bactericidal and/or bacteriostatic. The chelating properties of chitosan also make it an excellent antifungal agent. The presence of chitosan activates many defence responses in plants. Usually, it is employed in plant disease control as **a powerful elicitor that activates immune system in plants.**

**Agrocel's Maha Kite is a Natural Eco-Friendly product.**

## Benefits

- **Maha Kite** builds up crop immunity and enhances resistance to crop disease like; Fungal, Viral & Bacterial.
- **Maha Kite** enhances the ability of plants to withstand the heat/cold stress and drought.
- **Maha Kite** offers the plant ability to grow with less water, can accelerate growth, germination, and improve the quality of flowers and fruit.
- **Maha Kite** is effective against Seed borne pathogens when applied as seed treatment.
- **Maha Kite** has Broad spectrum Fungicidal and Antiviral activity.

## Application

- Make a solution by dissolving 5gm **Maha Kite** into 15 litre clean water.
- Mixing with less than 7 pH water, gets dissolved properly. If pH of water is more than 7 pH, then add 2-3 drops of Lemon in Water and mix well.
- Shake well for 2-3 mins and then filter in Muslin or cotton cloth.
- Spray on the crops at an Interval of 10 to 15 days depending on Plant Growth and disease infestation.

## Packing

**Maha Kite** is now available in Vacuum Sealed pack in order to retain its quality.  
**Available in 5gm & 70gm Pouch packing.**
